

## **Postdoctoral sponsorship in Computer Science and related fields**

The Department of Ingeniería Informática at Universidad de Santiago de Chile (<http://www.informatica.usach.cl/>) is seeking candidates for sponsoring postdoctoral research applications in computer science and engineering. We encourage applicants to consider the current grant opportunity [FONDECYT Postdoctorado 2023](#), which is open until **April 28th, 2022**.

Our Department focuses on the following applied research areas:

- Industry
- Biology and Medicine
- Society
- Education
- Science

Within these areas, a variety of topics and domains are researched, which include, but are not limited to: biomedical engineering, bioinformatics, search as learning, human-computer information retrieval, astro informatics, computational astrophysics, software engineering, virtual reality, scalable systems, and operational research, among others.

A complete list of our faculty members and their research areas is available at:  
<https://informatica.usach.cl/departamento/academicos/>

Applicants should have completed their Ph.D. in computer science, computer engineering, information science, biomedical engineering, or related topics after January 2019. Evidence of the ability to pursue an independent program of research is required. Postdoc positions are available for three calendar years as full-time appointments.

For more information, please contact our Research Director, Dr. Roberto González-Ibáñez ([roberto.gonzalez.i@usach.cl](mailto:roberto.gonzalez.i@usach.cl)) or directly with one of our faculty members that best matches your research interests.
